

Description

A superior corrosion and oxidation protection for all metals.

Range of application

Metaflux 70-37 has both primary and secondary protection applications. Primary rust protection for all clean non-corroded metallic surfaces to prevent the formation of rust.

Secondary rust protection for all metallic surfaces that are already affected by rust, forming a water and air-proof barrier.

Features

- Primary and secondary corrosion protection for metal surfaces
- Excellent adhesion to clean or rusty surfaces
- Good penetration on welded areas
- Can be top coated with any paint or varnish
- Highly resistant to acids and alkalis
- Good UV stability
- Resistant to water infiltration
- Air-proof
- Corrosion test according to DIN 53.210 and DIN 53.209
- Red / brown colour
- Salt spray test as per DIN 50.021: 600 hours
- Temp. resistance: up to +120°C [+248°F]

400 ml
