

Description

The ultimate anti-seize, anti-wear and anti-corrosion agent.

Range of application

Prevents wear out, seizing and corrosion of mechanical connections, sliding parts bearing extreme loads (i.e. forklifts), reduces vibration noises (e.g. squeaking of breaks).

70-81 facilitates removal of nuts off damaged threading by remodelling the thread.

Impervious to cold and heat. Recommended for all industries.

Features

- Unique industrial heavy duty metal lubricant based on titanium to secure highest performance in all extreme conditions throughout the time
- Resistant to saltwater, water, oil, petrol, most acids, lye, gases and vapours
- Abrasion-resistant
- Non-flaking if exposed to continuous heat or rinsing
- Prevents galvanic contact corrosion
- Nickel, copper and aluminium-free with no possibility of electrolyte formation
- Titanium lubricant base
- Temp. resistance: -180°C to +1350°C [-356°F up to +2 462°F]
- Pressure resistance: 2 400 kPa/cm² (= 23 400 N/cm²) [33 938 psi]

400 ml
