

Made in Germany

Test Inks PINK and Test Pens PINK available from 22 to 60 mN/m

PINK coloured Test Inks are special testing liquids in ranges of defined surface tension. They were developed to get "non toxic" Test Inks. These PINK Test Inks are meant to substitute the BLUE coloured inks as they were declared to be toxic according to DIN 53364 / ISO 8296. The PINK Test Inks are available in bottles or in pens.

Test Inks PINK in bottles

- from 22 to 60 mN/m
- accuracy +/- 0,5 mN/m
- observation time 22 to 26 mN/m is 2 sec.
- observation time 28 to 44 mN/m is 4 sec.
- observation time 45 to 60 mN/m is 2 sec.
- bottles containing 10 or 100 or 250 mL
or in sets of 7 bottles of each 10 mL

Test Pens PINK

- from 22 to 60 mN/m
- accuracy +/- 1,0 mN/m
- observation time 22 to 26 mN/m is 2 sec.
- observation time 28 to 44 mN/m is 4 sec.
- observation time 45 to 60 mN/m is 2 sec.
- simple handling
- no spilling
- pen sets available in sets of 4, 6 and 8 pcs.
or as single pens, 5 mL

Test Pens PINK Jumbo

- from 30 to 44 mN/m
- accuracy +/- 1,0 mN/m
- observation time 28 to 44 mN/m is 4 sec.
- simple handling
- no spilling
- line width 15 mm
- optimal for testing large film areas
- pen sets available in sets of 4, 6 and 8 pcs.
or as single pens, 17 mL
