2.2. Label elements		
2.2.1. Labelling according to	Regulation (E	EC) No 1272/2008 [CLP]
Hazard pictograms:	$\otimes$	
Signal word:	Danger	
Hazard statements:	H222 H229 H315 H317 H336 H351 H372 H411	Extremely flammable aerosol. Pressurized container: May burst if heated. Causes skin irritation. May cause an allergic skin reaction. May cause drowsiness or dizziness. Suspected of causing cancer by inhalation. Causes damage to lungs through prolonged or repeated inhalation exposure. Toxic to aquatic life with long lasting effects.
Precautionary statements:	P201 P210 P251 P260 P280 P308/313 P410/412	Obtain special instructions before use. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Do not breathe vapours/spray. Wear protective gloves and eye protection. IF exposed or concerned: Get medical advice/attention. Protect from sunlight. Do not expose to temperatures exceeding 50 °C.
Supplemental information:	None	
2.2.2. Labelling according to	o 29 CFR 1910.	1200 / WHMIS 2015
Hazard pictograms:		
Signal word:	Danger	
Hazard statements:	H222 H280 H315 H317 H336 H351 H372 H411	Extremely flammable aerosol. Contains gas under pressure; may explode if heated. Causes skin irritation. May cause an allergic skin reaction. May cause drowsiness or dizziness. Suspected of causing cancer by inhalation. Causes damage to lungs through prolonged or repeated inhalation exposure. Toxic to aquatic life with long lasting effects.
Precautionary statements:	P201 P210 P211 P251 P260 P264 P270 P271 P272 P273 P280 P302/352 P304/340 P308/313 P362/364 P403 P410/412 P501	Obtain special instructions before use. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use. Do not breathe vapours/spray. Wash skin thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Contaminated work clothing must not be allowed out of the workplace. Avoid release to the environment. Wear protective gloves and eye protection. IF ON SKIN: Wash with plenty of soap and water. IF INHALED: Remove person to fresh air and keep comfortable for breathing. IF exposed or concerned: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. Store in a well-ventilated place. Protect from sunlight. Do not expose to temperatures exceeding 50 °C/122 °F. Dispose of contents/container to an approved waste disposal plant.

## SECTION 4: FIRST AID MEASURES

#### 4.1. Description of first aid measures

**Inhalation:** Remove to fresh air. If not breathing, administer artificial respiration. Contact physician.

**Skin contact:** Wash skin with soap and water. Take off contaminated clothing and wash it before reuse. Contact physician if irritation persists.

**Eye contact:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

## **Ingestion:** Do not induce vomiting. Contact physician immediately.

## 4.2. Most important symptoms and effects, both acute and delayed

Irritating to skin. May cause skin sensitization as evidenced by rashes or hives. High vapor concentrations may cause eye and respiratory tract irritation, dizziness, headache and other central nervous system effects.

#### 4.3. Indication of any immediate medical attention and special treatment needed

Treat symptoms.

Date: 29 December 2020

## SECTION 5: FIREFIGHTING MEASURES

# 5.1. Extinguishing media

Suitable extinguishing media: Carbon dioxide, dry chemical, foam or water fog

Unsuitable extinguishing media: High volume water jet

## 5.2. Special hazards arising from the substance or mixture

Pressurized containers, when heated, are a potential explosive hazard.

## **5.3.** Advice for firefighters

Cool exposed containers with water. Recommend Firefighters wear self-contained breathing apparatus.

Flammability Classification:

## HAZCHEM Emergency Action Code: 2 Y

## SECTION 6: ACCIDENTAL RELEASE MEASURES

## 6.1. Personal precautions, protective equipment and emergency procedures

Utilize exposure controls and personal protection as specified in Section 8.

## **6.2. Environmental Precautions**

Keep out of sewers, streams and waterways.

## 6.3. Methods and material for containment and cleaning up

Scoop up and transfer to a suitable container for disposal. Keep away from sources of ignition - No smoking.

## 6.4. Reference to other sections

Refer to section 13 for disposal advice.

## SECTION 7: HANDLING AND STORAGE

## 7.1. Precautions for safe handling

Observe good work practice - avoid eating, drinking and smoking in the work area while using any hydrocarbons. Do not breathe vapours/spray. Utilize exposure controls and personal protection as specified in Section 8. Remove contaminated clothing and wash before reuse. Do not spray on a naked flame or any incandescent material. Keep away from sources of ignition - No Smoking.

## 7.2. Conditions for safe storage, including any incompatibilities

Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50°C (120°F). Do not pierce or burn, even after use.

## 7.3. Specific end use(s)

Petroleum base. Use on stainless steel, steel, iron, aluminum, copper, brass, titanium, etc. Do not use on oxygen systems. Refer to the product instructions and product data sheet for more detailed application information.

## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

# 8.1. Control parameters

## Workers

Not available

## Predicted No Effect Concentration (PNEC) according to Regulation (EC) No 1907/2006:

Not available

## 8.2. Exposure controls

#### 8.2.1. Engineering measures

Use only in well-ventilated areas. If exposure limits are exceeded, provide adequate ventilation.

## 8.2.2. Individual protection measures

Respiratory protection:	Not normally needed. In case of insufficient ventilation, utilize an approved organic vapor respirator (e.g., EN filter type A/P2).
Protective gloves:	Chemical resistant gloves

Chemical resistant gloves

Nickel:

Contact type	Glove material	Layer thickness	Breakthrough time *
Full	Nitrile rubber	0.11 mm	> 480 min.
Splash	Nitrile rubber	0.11 mm	> 480 min.
*Determined acco	ording to EN374 standa	rd	

Determined according to EN3/4 standard.

#### Eye and face protection: Safety glasses

Other:

None

# 8.2.3. Environmental exposure controls

Refer to sections 6 and 12.

## SECTION 12: ECOLOGICAL INFORMATION

Ecotoxicological data have not been determined specifically for this product. The information given below is based on a knowledge of the components and the ecotoxicology of similar substances.

## 12.1. Toxicity

Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

## **12.2.** Persistence and degradability

Naphtha (petroleum), hydrotreated light: inherently biodegradable. Naphtha (petroleum), hydrotreated light, Petroleum gases, liquefied, sweetened: oxidize by photochemical reactions in air. Distillates (petroleum), hydrotreated heavy naphthenic: inherently biodegradable [31% biodegradation (OECD 301F, 28 days)]. Nickel, Aluminum, Graphite: inorganic substances.

# 12.3. Bioaccumulative potential

Naphtha (petroleum), hydrotreated light, Octanol/water partition coefficient (log Kow): 2.1 - 5 (estimated). Propane, Butane, Distillates (petroleum), hydrotreated heavy naphthenic, Nickel, Aluminum, Graphite: not expected to bioaccumulate. Methanol: low potential for bioaccumulation (BCF < 100).

## 12.4. Mobility in soil

Liquid. Insoluble in water. In determining environmental mobility, consider the product's physical and chemical properties (see Section 9). Low boiling point naphtha, Petroleum gases, liquefied, sweetened: will rapidly evaporate to the air if released into the environment.

## 12.5. Results of PBT and vPvB assessment

Not available

## **12.6. Other adverse effects**

None known

## SECTION 13: DISPOSAL CONSIDERATIONS

## 13.1. Waste treatment methods

Incinerate absorbed material with a properly licensed facility. Incinerate pressurized or sealed containers in an approved facility. Treatment for nickel may need to be provided after incineration and prior to any land disposal. This product is classified as a hazardous waste according to 2008/98/EC. Check local, state and national/federal regulations and comply with the most stringent requirement.

	the classification for mixtures according to Regulation (EC) No 1272/2008 [CLP]:
Classification	Classification procedure
Aerosol 1, H222 Skin Irrit. 2, H315	On basis of components Calculation method
Skin Sens. 1, H317	Calculation method
STOT SE 3, H336	Calculation method
Carc. 2, H351	Calculation method
STOT RE 1, H372	Calculation method
Aquatic Chronic 2, H411	Calculation method
	<ul> <li>H301: Toxic if swallowed.</li> <li>H304: May be fatal if swallowed and enters airways.</li> <li>H311: Toxic in contact with skin.</li> <li>H315: Causes skin irritation.</li> <li>H317: May cause an allergic skin reaction.</li> <li>H319: Causes serious eye irritation.</li> <li>H331: Toxic if inhaled.</li> <li>H336: May cause drowsiness or dizziness.</li> <li>H351: Suspected of causing cancer.</li> <li>H370: Causes damage to organs.</li> <li>H372: Causes damage to organs through prolonged or repeated exposure.</li> <li>H411: Toxic to aquatic life with long lasting effects.</li> <li>H412: Harmful to aquatic life with long lasting effects.</li> </ul>
Hazard pictogram names:	Flame, gas cylinder (non-CLP labelling) exclamation mark, health hazard, environment
Changes to the SDS in thi	s revision: Section 14.8.
Revision date: 29 Decem	nber 2020
Further information: No	ne
	/ on data provided by suppliers of the materials used, not on the mixture itself. No warranty is expressed or implied product for the user's particular purpose. The user must make their own determination as to suitability.
